## MONITOR

*The Cityline video entry panel for audio-video communication with homes.*

### **TODAY YOU NEED TO SEE WHO IS CALLING AT YOUR DOOR**

The LOFT monitor is the best-selling video door entry system.  
The smart and practical answer adapted to modern day interiors.

It is the model needed to turn a basic audio door entry installation  
into video door entry, quickly and with no need of extra work.

The monitor, which occupies the space of the telephone,  
efficiently communicates the home with outdoors, letting you  
see who is calling and who enters the building.

## DESIGNED FOR THE HOME

Designed to be integrated in the home, Loft is the answer to the aesthetic and functional needs of the homes of today. It is manufactured in high impact ABS plastic, with a textured finish for easy cleaning, as well as ultraviolet protection for better light resistance.

Its surface mounted assembly lets you cover the gap left by the old telephone, with no need to flush it in the wall or with no extra working time.

The earpiece curly cord has phone plug type connectors to prevent rolling up. A magnet located in the handset leaves it hung up perfectly, avoiding it falling off.

When a call is received, the image comes up on the monitor automatically. When you pick up, you can hold a conversation with the visitor.

To open the door, press the button . The image disappears automatically after a few seconds or when the handset is replaced.

Monitor dimensions: 203(W)x220(H)x60(D)mm.

## ACCESSORIES AND DIMENSIONS
